## About Us:

Winding Creek Nursery is a wholesale and retail nursery, conveniently located close to US 131, halfway between Grand Rapids and Kalamazoo. We are Michigan natives who take pride in growing Michigan Native trees, such as the Sugar Maple, Red Maple, White Oak, Red Oak and more. We also grow many other popular cultivars to fit the needs of your landscaping projects. All trees grown at our nursery are deciduous shade and ornamental trees, grown in the ground until they are sold. This ensures a healthy tree which is already acclimated to Michigan weather. Once a tree is sold, it will be dug with a tree spade and placed in burlap with a wire basket. Our farm is mostly clay, assuring a solid and healthy root ball. We also stock and can special order evergreen trees from other quality wholesale Michigan tree farms.

## Why Plant Trees?

- The value of a well landscaped home is 5-20% higher than a home with no landscaping.
- Trees reduce cooling costs in the summer by shading your home, and when the leaves fall off in the fall, they allow the sun to warm your home during the cold months of the year.
- Trees and especially evergreens also act as a windbreak to protect your home and keep drafts away.
- The leaves of trees absorb carbon dioxide, ozone, carbon monoxide, sulfur dioxide, along with other harmful contaminants in the air, and release clean oxygen.
- Creates habitat and food for birds and mammals
- Adds privacy and comfort to your landscape
- Beneficial to our environment and overall well being

## Purchasing from Winding Creek Nursery:

Please know that because our trees are grown in the ground, they can only be transplanted during the spring and fall. Call us at 269-838-4813 to make an appointment to tour our nursery any time of year. When you visit, you'll hop on our golf cart and take a tour of our 30-acre nursery. We will answer your questions and help you decide what trees will best fit your landscaping needs. If you decide to purchase, we can then determine when to schedule a pickup, delivery, or even an installation. We kindly ask for a 50% deposit before we move forward. Accepting cash and check payments only.

## Delivery and Installation:

Our ultimate goal when planting a tree is to make your yard look like the tree was there all along, leaving no evidence we were ever there and no damage. We have experience planting trees at hundreds of yards across west Michigan. This experience has taught us that there is a lot of information to discuss upfront, for your benefit and ours.

Our truck and trailer setup is very large, essentially the size of a semi-truck. We need adequate parking, and room to unload trees from at least one side of the trailer.

Trees are very heavy, the largest ones we plant can weigh close to a thousand pounds. Therefore, we plant all trees with a skid steer and various attachments such as a large auger and hydraulic forks. We absolutely need to be able to use this equipment to plant our trees. Low wires, small gates, tight spaces, steep hills, delicate grass, wet ground, retaining walls and other problems can all interrupt or prevent this process. We need to know about these prior to the installation date. Also, trees must be installed at least eight feet away from an existing tree stump.

When placing a large root-ball in the ground, a lot of extra dirt is created. Generally, this dirt is feathered around the tree, creating a slight mound. Or, we can scoop the dirt up and haul it to a place of your choosing in your yard. However, we will not haul the extra dirt away.

We will call Miss-Dig prior to the installation to mark utilities. Please consider the location of your septic system, irrigation and dog fences when choosing where to plant your trees. We are not responsible for damage to anything under your yard not marked by Miss-Dig.

Installation dates are subject to change due to rain. Using our equipment when the ground is wet creates the potential to leave ruts and other damage.

Pickup:

Pricing:

Our trees weigh between two hundred to one thousand pounds. Therefore, we will not put a tree in your minivan or SUV.

We will happily load trees on to an open truck bed or open trailer, and help make sure the trees are secured and protected. Please bring ratchet straps and tarps to protect the leaves and buds from wind burn while they are in transit.
